```
method: GET
entry parameters: id
response: ['message', 'data'], 201)
Route::get('group/{id}', [App\Http\Controllers\GroupsController::class, 'group']);
```

/api/message

```
method: GET
entry parameters: id
response: ['message', 'data'], 201)
Route::get('message', 'App\Http\Controllers\MessageController@messages');
```

/api/message/{id}

```
method: GET
entry parameters: id
response: ['message', 'data'], 201)
Route::get('message/{id}', 'App\Http\Controllers\MessageController@message');
```

/api/attendance

```
method: GET
Route::get('attendance', 'App\Http\Controllers\AttendanceController@attendances');
```

/api/attendance/{id}

```
method: GET
Route::get('attendance/{id}', 'App\Http\Controllers\AttendanceController@attendance');
```

/api/attendancesByEvent/{id}

```
method: GET
entry parameters: id
response: ['message', 'data'], 201)
Route::get('attendancesByEvent/{id}', 'App\Http\Controllers\AttendanceController@attendancesByEvent');
```

/api/attendancesByUser/{id}

```
method: GET
entry parameters: id
response: ['message', 'data'], 201)
Route::get('attendancesByUser/{id}', 'App\Http\Controllers\AttendanceController@attendancesByUser');
```

auth

/api/register

```
method: POST
entry parameters: ['email', 'password', 'device_name']
response: ['message', 'token'/'error']
Route::post('register', 'App\Http\Controllers\AuthController@register');
```

/api/token

```
method: POST
entry parameters: ['email', 'password', 'device_name']
response: ['message', 'token'/'error']
Route::post('token', 'App\Http\Controllers\AuthController@requestToken');
```

PROTECTED

/api/latest/events

```
method: GET
entry parameters: id
response: ['message', 'data'], 201)
Route::get('latest/events', 'App\Http\Controllers\EventController@latestEvents');
```

/api/latest/messages

```
method: GET
entry parameters: id
response: ['message', 'data'], 201)
Route::get('latest/messages', 'App\Http\Controllers\MessageController@latestMessages');
```

/api/apology/{id}

```
method: GET
entry parameters: id
response: ['message', 'data'], 201)
Route::get('apology/{id}', 'App\Http\Controllers\ApologyController@userApology');
```

/api/apologies/{teamId}

```
method: GET
entry parameters: id
response: ['message', 'data'], 201)
Route::get('apologies/{teamId}', 'App\Http\Controllers\ApologyController@teamApologies');
```

invitation

/api/invitation

```
method: GET
entry parameters: id
response: ['message', 'data'], 201)
Route::get('invitation', 'App\Http\Controllers\InvitationsController@createInvitation');
```

/api/invitation

```
method: POST
entry parameters: ['code']
response: ['message', ?'error']
Route::post('invitation', 'App\Http\Controllers\InvitationsController@verifyInvitation');
```

Getting events

/api/allEvents

```
method: GET
entry parameters: id
response: ['message', 'data'], 201)
Route::get('allEvents', 'App\Http\Controllers\EventController@allEvents');
```

/api/event

```
method: GET
entry parameters: id
response: ['message', 'data'], 201)
Route::get('event', 'App\Http\Controllers\EventController@events');
```

/api/event/user/{id}

```
method: GET
entry parameters: id
response: ['message', 'data'], 201)
Route::get('event/user/{id}', 'App\Http\Controllers\EventController@getUsersEvents');
```

/api/event/{id}

```
method: GET
entry parameters: id
response: ['message', 'data'], 201)
Route::get('event/{id}', 'App\Http\Controllers\EventController@event');
```

```
method: POST
entry parameters: ['name', 'users', 'team_id', 'permanent']
response: ['message']
Route::post('group', [\App\Http\Controllers\GroupsController::class, 'createGroup']);
```

event creation / edition

/api/event

```
method: POST
entry parameters: ['name', 'date', 'duration', 'repeated', 'location', 'creator_id', 'individualParticipants', 'groups', 'color']
response: ['message', ?'error']
Route::post('event', 'App\Http\Controllers\EventController@createEvent');
```

/api/event

```
method: PUT
entry parameters: ['name', 'date', 'duration', 'repeated', 'location', 'creator_id', 'individualParticipants', 'groups', 'color']
response: ['message', ?'error']
Route::put('event', 'App\Http\Controllers\EventController@updateEvent');
```

/api/event/{id}

```
method: DELETE
response: ['message']
Route::delete('event/{id}', 'App\Http\Controllers\EventController@deleteEvent');
```

apologies

/api/apology

```
method: POST
entry parameters: ['name', 'text', 'dateFrom', 'dateUntil', 'user_id']
response: ['message', ?'error']
Route::post('apology', 'App\Http\Controllers\ApologyController@createApology');
```

/api/apology/{id}

```
method: DELETE
Route::delete('apology/{id}', 'App\Http\Controllers\ApologyController@deleteApology');
```

messages

/api/message

```
method: POST
entry parameters: ['message', 'user_id']
response: ['message', ?'error']
Route::post('message', 'App\Http\Controllers\MessageController@createMessage');
```

/api/message/{id}

```
method: DELETE
Route::delete('message/{id}', 'App\Http\Controllers\MessageController@deleteMessage');
```

profile

/api/person/{id}

```
method: POST
entry parameters: ['person_id', 'first_name', 'last_name', 'height', 'weight', 'position']
response: ['message', ?'error']
Route::post('person/edit', 'App\Http\Controllers\PersonController@addPersonDetails');
```

/api/person/{id}

```
method: GET
entry parameters: id
response: ['message', 'data', 201]
Route::get('person/{id}', 'App\Http\Controllers\PersonController@getPersonDetails');
```
